

FILEminimizer[™] Server

Office and image file compression on servers. Optimizes primary storage, saves storage space and accelerates backups.

FILEminimizer Server compresses PowerPoint presentations, Word documents and Excel spreadsheets as well as image files in the formats JPG, TIFF, BMP, GIF, EMF and PNG directly on the file server by up to 98%.

The original format is retained so that files can be opened and edited - without any decompression needed.

With an average compression rate of over 70%, FILEminimizer Server helps IT Administrators to instantly gain back enormous storage space, save on data transfer and storage costs and shorten backup times.

Functions

- Microsoft Office file compression on servers by up to 98%
- Image file compression on servers by up to 98%; lossless compression on images in the formats JPG, TIFF, GIF, EMF, BMP and PNG
- Supports all Microsoft Office files from Office 97 through 2010 (DOCX, PPTX, XLSX)
- Keeps the original file format and functionality - no unzipping required
- Multi-Core Support: perform fast optimizations using every processor on your server
- Scheduler for automated server optimizations

FILEminimizer[™] Suite

Compresses PowerPoint, Word, Excel and image files by up to 98% without changing the native file format. No decompression needed.

FILEminimizer Suite compresses PowerPoint, Word, Excel and image files by up to 98% without zipping. The software sports an intuitive interface and lets you optimize the size of your Microsoft Office files (97-2010) as well as your JPG, TIFF, BMP, GIF, EMF and PNG image files without changing the native file format or quality.

It integrates into Microsoft Office and into your email program (supports Microsoft Outlook and Lotus Notes clients) and can optimize your office and image attachments directly before sending. It relieves Microsoft Exchange and Lotus Domino email servers.

Functions

- Compresses all Microsoft Office formats: PowerPoint 97 to 2010, Word 97 to 2010, Excel 97 to 2010
- Compresses JPEGs and photos as well as BMP, PNG, TIFF, GIF and EMF images
- Keep the original file format - no unzipping required
- On-the-fly optimization of email attachments in Microsoft Outlook and Lotus Notes
- Add-ins for Microsoft Office and Windows Explorer

About balesio AG

balesio is a leading provider of standard software in the area of file compression and file optimization with its FILEminimizer product line (client and server solutions) as well as in the area of screen recording, presentation and e-learning with its products ALLCapture and TurboDemo.

Simple and Easy

With our software solutions customers can quickly achieve desired results without programming knowledge or long training periods.

Proven Return On Investment

Our software provides measurable quantitative and qualitative benefits and offers a fast and high return on investment.

References

Leading companies worldwide use our products. Here is a small overview:

FILEminimizer Custom Solutions

Utilize FILEminimizer technology for customized deployments.

The FILEminimizer optimization engine can be fully customized and integrated into closed systems like Microsoft SharePoint, etc. for real-time inline optimization of Microsoft Office and image files.

TurboDemo™

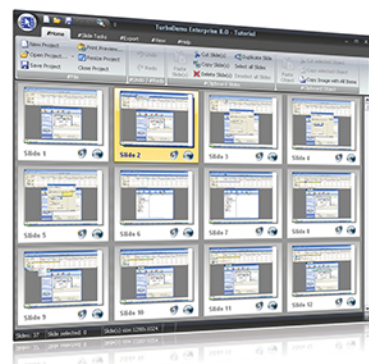

Capture screenshots and explain software, PC applications, websites and products with animated slide-per-slide demos and tutorials.

The idea behind TurboDemo is simple: Capture – Edit – Play.

TurboDemo uses an intelligent capturing technique for single screenshots that can then be edited as slides. Mouse movements are automatically reproduced.

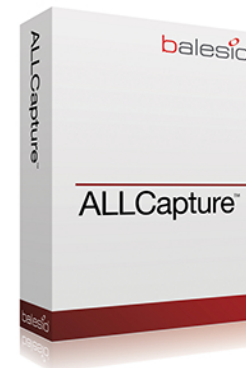

The created files are extremely small – only ~0.1 MB per minute of playback.

Projects can be exported into various formats for Internet, Intranet or published on CDs.

Functions

- Add text objects (e.g. speech bubbles) and interactive e-learning functions (e.g. quizzes)
- Export formats: Flash, ASF Windows Media Player, animated GIF, Java, AVI, EXE, PDF, Word
- SCORM compatible
- Also runs directly from the CD
- Enterprise version also available

ALLCapture™

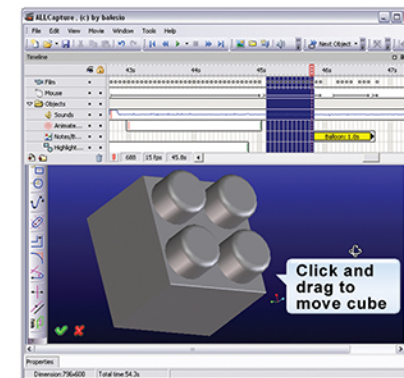

Create desktop videos and more with ALLCapture. Screen recording software to capture your screen in real-time.

ALLCapture is ideal for recording fluent movement such as online conferences and CAD-3D simulations.

With ALLCapture you can create presentations, onscreen videos and simulations from PC applications, websites, etc.

The resulting captured video can be edited in a variety of ways using the editing tools (e.g. speech bubbles).

Not only will ALLCapture capture your video but it will also capture your audio, or alternatively you can add it afterwards using the built-in Audio Editor.

Functions

- Memory Manager for hours of video recording
- Audio recording on multiple sound tracks, during recording or while editing
- Timeline for quick and precise editing
- Enterprise version includes SkinStudio and PanelStudio
