

Use the Native Format Optimization (NFO) technology of FILEminimizer in third party applications and closed systems and directly optimize all Microsoft Office and image files located there. Achieve permanent storage space reductions in databases and document management systems, in content management systems and in workflows through the easy and transparent integration of the FILEminimizer optimization engine with FILEminimizer SDK (Software Development Kit).

FILEminimizer SDK is a Software Development Kit, which allows for third party applications and external systems to access and use the FILEminimizer optimization technology by means of a Windows DLL file. Thus, the transparent native compression of PowerPoint, Word, Excel and image files can be directly integrated into other systems and programs.

FILEminimizer SDK consists of two DLL files, which contain the native file optimization technology of FILEminimizer. Using a vast majority of programming languages, among them Visual Basic, VB .net, C++, Delphi, C#, etc. the optimization can be integrated easily in other applications and systems. Office and images files can thus be reduced on average by 70%. You need less storage space and significantly increase the performance of the applications and systems where the FILEminimizer optimization is integrated into.

## Data Volume Reduction with FILEminimizer

## Integration examples of FILEminimizer SDK:

- Integration of FILEminimizer optimization in existing databases
- Integration of FILEminimizer optimization in document management systems such as EMC Documentum
- Integration in Document Workflow Management systems
- Integration in Collaboration Portals, Content Management systems, etc.

**Easiest implementation thanks to full support of all major and commonly used programming languages!**

## Supported File Formats:

- ✓ PowerPoint 97-2003 (.ppt, .pot, etc.)
- ✓ Word 97-2003 (.doc, .dot, etc.)
- ✓ Excel 97-2003 (.xls, .xlt, etc.)
- ✓ PowerPoint 2007-2010 (.pptx, .potx, etc.)
- ✓ Word 2007-2010 (.docx, .dotx, etc.)
- ✓ Excel 2007-2010 (.xlsx, .xltx, etc.)
- ✓ JPG, JPEG
- ✓ Bitmap (BMP)
- ✓ PNG
- ✓ EMF
- ✓ TIF, TIFF
- ✓ GIF

## Required Installation:

- ✓ FILEminimizersdk.dll
- ✓ FILEminimizer.dll

## Other Solutions:

### FILEminimizer Client

Automatic file optimization before sending via email (Outlook & Notes)

### FILEminimizer Server

File Optimization on storage systems (SAN, NAS) and file servers

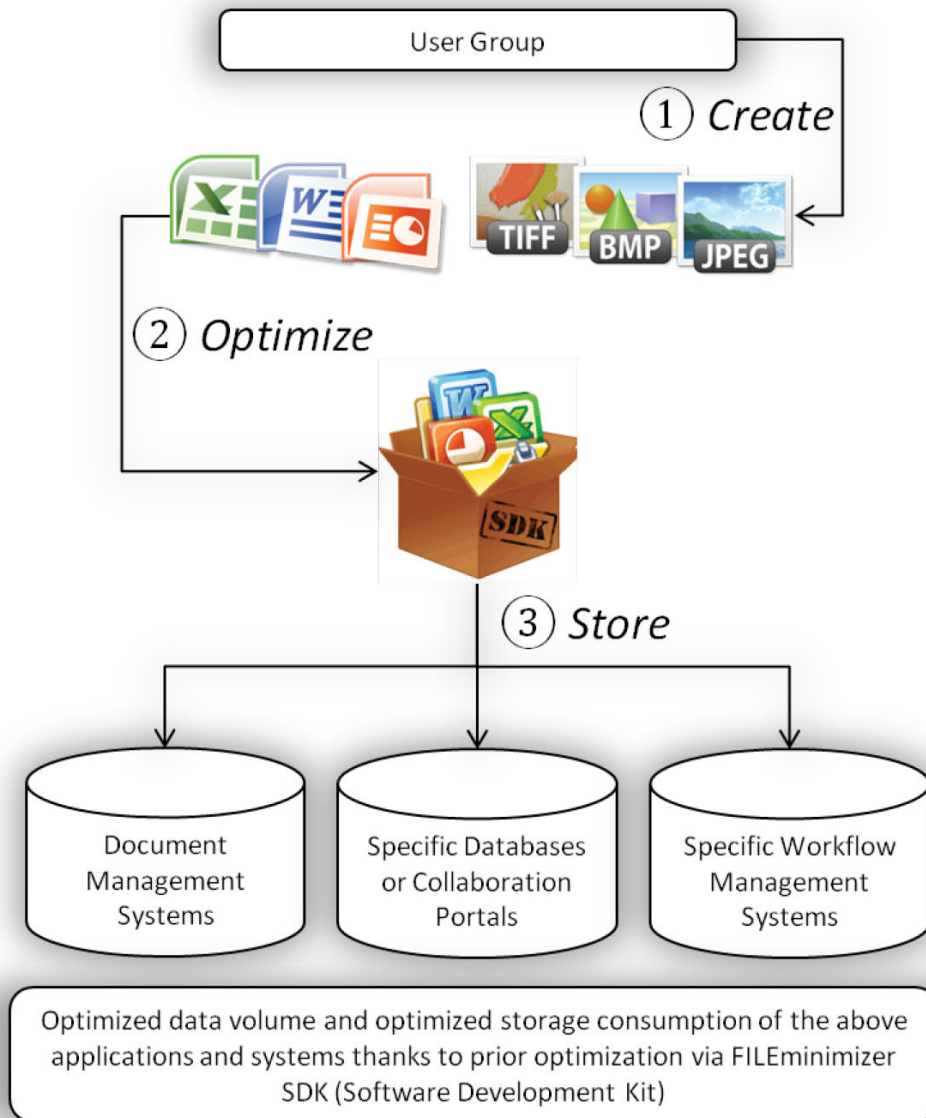

### FILEminimizer SharePoint

Automatic file optimization before uploading to SharePoint

## Already satisfied customers (partial list):

**FILEminimizer SDK: completely transparent integration of FILEminimizer's Native Format Optimization (NFO) technology for the optimization of Microsoft Office files and images**

## Further Features of FILEminimizer SDK:

- ✓ Flexible configuration settings
- ✓ Central configuration of the optimization
- ✓ Full support for most commonly used programming languages
- ✓ Multilingual
- ✓ Optimization engine is completely independent
- ✓ Transparent integration
- ✓ Support for multi-core optimizations
- ✓ Easily scalable and extendable
- ✓ And much more...
